Summary

A Front-end developer with 3+ years of experience delivering high-performance websites and driving client satisfaction. I have a deep understanding of building custom content management systems and implementing efficient workflows to manage website content. My expertise lies in utilizing technologies such as HTML, CSS, JavaScript, API integration, and React to create dynamic and interactive user interfaces. I continuously expand my skill set to leverage the capabilities of ReactJS and stay updated with the latest industry trends. I am dedicated to delivering excellence and developing high-performance websites that consistently exceed expectations.

Education

B.Engr. Agricultural Engineering - Osun State University | November 2022 - Present

Work Experience

TAZ Creative Group (Project: Anyworkx Africa) | Ogun State, Nigeria

Front-end Developer - November 2021 - Present

- Collaborated with TAZ Creative Group to lead a diverse team in developing the Anyworkx Africa website. Utilized HTML, CSS, JavaScript, Fetch API, and WebSockets to create frontend components, implemented an interactive admin panel, and a messaging app with API integration.
- Successfully delivered the project, meeting client requirements and achieving impressive SEO rankings, resulting in significant website traffic and an average user engagement of 1 minute and 24 seconds.
- Developed and implemented comprehensive systems, including a content management system, applicant management system, and messaging app development, Successfully tackled challenges by conducting research and employing iterative problem-solving techniques.
- Conducted user testing, collected feedback, and resolved issues to enhance website functionality and user experience, ensuring transparency through regular progress reports and client updates.

Unknown Satoshi | Lagos State, Nigeria

Front-end Developer - October 2021 - January 2023

- Contributed to the web development project, with an emphasis on front end features, browser manipulation, and cross-browser compatibility.
- In collaboration with a backend developer, created an easy-to-use admin panel with different levels of user permission to manage the contents and users on the website.
- Web page development from design to test and up to production deployment.
